

THE VALUE OF ENERGY STAR CERTIFIED PRODUCTS

As an Energy Star Partner, we offer all of the benefits that come with Energy Star

qualified windows and doors — greater energy efficiency, lower fuel bills, improved home comfort, reduced condensation potential, decreased carbon footprints and protection against damaging UV rays that affect interior fading of floors, carpets and furniture.

UNRIVALED GLASS PERFORMANCE

Brighton windows and doors have an energy-efficient glass package to satisfy every home, in every city and state — regardless of your climate challenges. Selecting the right glass package for your home will heighten energy-efficiency and provide you with a more consistent level of comfort throughout the year.

THE ENERGY SERIES GLASS PACKAGES INCLUDE —

ENERGYBASIC

Our most basic, single-coat Low-E system. It provides as much as 30% better U-Value and Solar Heat Gain coverage than clear glass.

ENERGY3S

Quaker's best single-coat Low-E. Compared to our EnergyBasic package, it delivers Solar Heat Gains around 25-30% better combined with similar or slightly better U-Values.

ENERGYPLUS

An upgraded glass package containing 2 coats of Low-E. It excels against U-V rays, with U-Values up to 15% better than single coat Low-E. Solar Heat Gains are similar to our EnergyBasic.

ENERGYMAX

Our highest performing Low-E package. It contains 2 superior coats of Low-E, giving you the absolute best U-Values and Solar Heat Gain coverage all in one glass system

ENERGYNORTH

Get the entire breadth of natural comfort from your Brighton windows with this Dual Low-E package, specifically developed for Energy Star's Northern Climate Zone.
